In Boomerang, Professor Andy Whitney s dream-sharing project is stolen by rogue government factions who unwittingly rip a hole in space, a huge, black elliptic, large enough to block out the Sun. No one knows where the elliptic leads, but they do know that time runs faster on the other side.and the elliptic is still growing. In Moonspun, the second book in the Boomerang series, a barrage of meteors comes through the elliptic, and the devastation is felt worldwide. Andy is on a team of scientists tasked with studying the elliptic and the meteors only to discover their trajectory is far from random. But when a hostile alien ship lands on the remains of the Pentagon, it s up to the survivors to take action. Together, they must fight, not only for their lives, but to determine the fate of humankind. Told through the eyes of reporter Jim Blake in the year 2045, Moonspun is a nail-biting, high-stakes adventure against a ticking clock. As the world learns more about the ominous elliptic in Earth s orbit and scientists rush to close it before it s too late, only one question remains: will the human race survive the impending alien attack?.
